CONTENTS

Image reconstruction of subsurface damage in unidirectional fiber composite laminate by dynamic shear strain analysis of lamb wave- A numerical approach
M. Sanaul Rabbia, K. Teramoto and Md. T. I. Khan; Japan

A New Automatic Diagnosis Method Based on the Multivariable Analysis for Structural Faults of Rotary Machinery
G.Y. Guan, L.Y. Song, H.q. Wang, K. Li4 and P. Chen; Japan and PRC

Development of a degradation index for machinery condition monitoring using the fictitious frequency response function and its application to a centrifugal compressor
Kihong Shin; Korea

Online Vibration Condition Monitoring of Gas Circulation Fans in Hardening Process
Ali Rastegari and Andreas Archenti; Sweden

Motor Current Signature Analysis (MCSA) from membrane patch maker: assessment for the solid contamination level from used oil samples
Surapol Raadnui; Thailand

Magnus effect on Aerodynamic Characteristics on Wing Airfoil MH45
S. Ketan, P. Vishal, R. Sundeep, P. B. Shetty and R. K. Mishra; India

Spur Gear Wear Debris Morphological Analysis as applied for diagnostic purpose
Surapol Raadnui; Thailand

Abstracts of the 29th International Congress on Condition Monitoring and Diagnostic Engineering Management (COMADEM 2016) – Part 3

Call for Papers Invitation to participate in COMADEM 2017

Annual Subscription (electronic version only):
Individual Subscription - £ 320 for 1 Volume containing 4 Issues. There are other types of subscriptions. For full details please visit our website. Subscribers can transfer the amount of subscription directly into COMADEM International Bank account using the Swift Code and Bank Account number provided in the Subscription Invoice. Subscribers can request for an invoice if they have not received one for the renewal of the subscription. A copy of Bank Transfer Advice should be sent electronically giving full details of the transaction, type of subscription, subscriber's address etc. Subscription through a cheque of requisite amount drawn in favour of COMADEM International.

CMIS is a competence center within Luleå University of Technology in the field of maintenance, which encompasses research, training and dissemination of information.

- eMaintenance & Information Logistics
- Remaining Useful Life Estimation
- Maintenance Decision Modelling
- Diagnostic & Prognostic
- RAMS
- LCC/LCP
- Condition Monitoring
- Human Factors

Luleå Railway Research Center

JVTC is the best platform for research and innovation in reliability and maintenance of the railway system.

- Dependability - RAMS, LCC, Risk Analysis
- Wear and Failure Reduction
- Information Logistics - eMaintenance Solutions
- Maintenance Management and Human Factors

Whenever you think of research and innovation in railway maintenance, think of us!
